---

Howdy all,

I have recorded this as a potential unauthorized activity. I believe it has yet to be assigned to a project manager.

Kristin Shivers  
Project Manager  
Compliance Branch  
U.S. Army Corps of Engineers  
2000 Fort Point Road

Kristin will have the latest information on that status. I will add her to this email chain, so she can provide an update to you.

Happy Thanksgiving,  
Felicity

OK, thanks.

Any update on the compliance review status?

Thanks,

I am still the primary POC for the SJWP AOC. Sorry that I was not able to respond to your call last week, but I understand that you were able to contact Kristin Shivers in our Compliance Section to get assistance with your questions. She would be who I referred you to, but if you have any other questions I can help with, please let me know.

Best,  
Felicity

Are you still the contact persons for the San Jacinto Permit Evaluation Requirement Process? The report below is about dredging near the San Jacinto waste pits, and has a permit application been made for this? If you are not the current person for this, please let me know who the current person is.

Thanks,

Gary Miller

EPA Remedial Project Manager

Subject: Fwd: Dredging the river shoreline

Good evening,

I relayed information to Gary this morning about dredging that is occurring along the San Jacinto River, northwest of the Waste Pits. The attached map and photos were submitted to me from a resident living nearby. For an additional reference, the ponds on the left side of the attached map/photo are Meadowbrook Park.

From what I've been told, the company dredging is Buffalo Marine and is owned by Paul Holt. The dredging is taking place to build a bulk head and store barges. The material pictured on the bank of the River was removed from the River bed by a small piece of dredging equipment and the operations are said to be expanding soon and larger equipment is being moved in.

I cc'd Rock Owens and Bob Allen to keep our local agencies in the loop!

Thank you,

Jackie Young
